And as a wife who deals with the money and budget in our marriage, I definitely could relate to her feelings on a lot of things. Though it is amazing to me that the couple would have separate accounts. I always thought that when two people got married, that's one of the first things

they do, is get a joint account. It may be a generational thing, since I'm almost 50 though. Young couples today are so used to dealing with everything separate or living together while having independent jobs, that it may be more common now. It's definitely easier to have everything joint, so that it's the family money, and you both work as a unit for all that the family needs. The book is good at showing the different ways of thinking about money, with one person more concerned about security and the other just happy with the status quo and thinking debt is the way to go, just because it's always been that way. I liked the story in how it showed how Tabitha earned money and worked it out to go to the conference. It was interesting that the husband decided to take the kids fishing on that precise weekend. Most men wouldn't do that. They like to do their hobby with their friends...not usually with their kids. Young men and old should take note of this in the book. Mothers need breaks sometimes... The only complaint I have about the book is I would have liked it to be longer and cover more how the couple got in better financial shape with specific details. Because I felt like book ended quickly. Overall, I recommend the book as a good example of how one family worked together to learn about finances and changed their thinking to make things better.

A few years ago I became convicted in my spirit to get rid of debt. Fortunately there were not tens of thousands of dollars to eliminate, still, two years into my journey I was battle worn. God is so good, I received a copy of this book for Christmas and read it that same evening. I am encouraged to stay the course and return to a life of abundance.

How Does a Husband and Wife Come to an Agreement About Money? Tabitha is a young mother of two who struggles with her family's finances every day. She's tried to talk with her husband, Jack, about their money struggles, but he won't listen. A friend of Tabitha's invites her to a weekend women's conference. How can Tabitha take off work and go to this conference, when she doesn't have the cash to go, and can't miss a day of work because their money is so tight? Find out how she overcomes these problems in *A Couple with Common Cents*.
