James Cutt, Vic Murray : Accountability and Effectiveness Evaluation in Nonprofit Organizations (Routledge Studies in the Management of Voluntary and Non-Profit Organizations) before purchasing it in order to gage whether or not it would be worth my time, and all praised Accountability and Effectiveness Evaluation in Nonprofit

Organizations (Routledge Studies in the Management of Voluntary and Non-Profit Organizations):

This unique volume provides new perspectives on assessing the performance of nonprofit organizations whilst meeting the information needs of decision-makers, both internal (such as resource-providers, regulators and clients), and external (including boards, managers, staff and volunteers). Whilst most discussions of accountability focus exclusively on financial accountability, this title offers a significant contribution to a relatively untouched area by combining the treatment of both evaluation and accountability from a managerial perspective. With increased interest in the concept that nonprofit organizations must be accountable, this topical volume fills a gap in the literature that postgraduates and scholars of business studies and management will find invaluable.

These authors offer new perspectives drawn from a research project on performance measurement, evaluation, and reporting in both public and private nonprofits. — Business Horizons This is the kind of book that nonprofit accountability studies have needed for a long time. — John G. McNutt, Boston College
