Very Useful By Sheryl Westleigh I bought this business planner because I greatly enjoyed Meg Ilasco's Craft, Inc.: Turn Your Creative Hobby into a Business and you should really consider getting both because they really compliment each other well. This planner is most useful for someone just starting their craft business it's still very helpful for more established businesses to help bring things into focus. I haven't finished all the sections yet (and a few like tradeshows aren't yet applicable to me) what I have filled out has helped me better organize my business. For someone who organization is difficult laying everything out in the planner is great motivation. I do have to concede that the use of yellow text on white paper on the section table of contents is quite hard to read it doesn't greatly effect it's usefulness since none of the actual workbook pages have this color combination. On recommendation for anyone getting this planner is to make sure you fill things out in pencil so you can later update it as things change. 0 of 0 people found the following review helpful. A Perfect Start By Christi I love this little book. It has really good worksheets and advice for starting up a craft/art business. It gives worksheets on how to price everything, figuring out all the little details on the legality of starting a business and what you, as the owner, want out of the business. Really useful, helpful, and practical. 1 of 1 people found the following review helpful. Must
