From Springer : Crisis Management in the European Union: Cooperation in the Face of Emergencies before purchasing it in order to gauge whether or not it would be worth my time, and all praised Crisis Management in the

European Union: Cooperation in the Face of Emergencies:

In less than a decade, Europe has witnessed a series of large-scale natural disasters and two major terrorist attacks. Growing concern about the trans-national effects of these incidents has caused the EU Member States to seek more multilateral cooperation. As a result, a system of common arrangements for handling large-scale emergencies or disasters has emerged, which, due to its quick and ad-hoc development, may seem almost impenetrable to newcomers to the field. This book seeks to provide a much-needed overview of disaster and crisis management systems in the EU. It provides a basic understanding of how EU policy has evolved, the EU's mandate, and above all, a concise and hands-on description of the most central crisis management arrangements. Written by some of Europe's main experts and consultants in the field, this book represents a unique and comprehensive source of information for everyone involved or interested in the European Union crisis management system. "This book will quickly become an indispensable resource for two groups: Practitioners will enjoy its accessible and comprehensive style. Academics curious about this emerging field will turn to it for an introductory overview. As someone who closely studies this field, I find the book engaging, detailed, and accurate, and I read every line with great interest. The authors are to be commended for the quality of research that went into this work." Mark Rhinard, Senior Research Fellow at the Swedish Institute of International Affairs (UI)
