Cordelia Strange : Environmental Science Protection: Keeping Our Planet Green before purchasing it in order to gage whether or not it would be worth my time, and all praised Environmental Science Protection: Keeping Our Planet Green:

Global warming, water and air pollution, and the loss of ecosystems are just a few of the environmental issues facing us today. The good news is there are actions we can take to prevent further issues, and hopefully even to correct some of the negative effects. There are even people who choose a career in environmental science and devote their lives to studying and trying to fix environmental issues—could you be one of them? The young adults of today will be the job force of tomorrow, so choosing a career that will best fit with the needs of the changing world will be important to job satisfaction and a successful life. With the vast array of career and job options, it will also be important for young adults to understand which work will be the best match for their interests, talents, goals, and personality types. Certain

careers are expected to gain importance within the early decades of the twenty-first century. According to the United States Bureau of Labor Statistics, the number of jobs for environmental scientists and specialists is expected to grow much faster than the average rate for all occupations. The environmental issues facing the planet today affect everyone in the world. If you choose a career in environmental science, you would be a part of making the planet a healthier place for future generations. You could help save the world—and that's not a bad day's work!
