**Marida Bertocchi, Giorgio Consigli, Rita D'Ecclesia, Rosella Giacometti, Vittorio Moriggia, Sergio Ortobelli :** Euro Bonds:Markets, Infrastructure and Trends: 7 (World Scientific Series in Finance) before purchasing it in order to gage whether or not it would be worth my time, and all praised Euro Bonds:Markets, Infrastructure and Trends: 7 (World Scientific Series in Finance):

Euro Bonds: Markets, Infrastructure and Trends presents the most recent developments in the Euro bond market. It discusses the problems of the Euro countries, the proposed solutions advocated by European as well as international institutions and investors. Particular emphasis is given to systemic risk and contagion as well as to specific innovative instruments such as structured financial products which protect various classes of investors. This self-contained title provides an organized and comprehensive overview of the current financial situation in Europe and accords the reader the opportunity to understand fully what is happening in the Euro financial market today, as well as some of the possible exit strategies from the crisis. It may be used as an advanced textbook by postgraduate students as well as ambitious undergraduates in finance and economics. It is also useful for non-experts in finance who wish to have an overview of problems in the Euro zone. Contents: The Bond Market in Europe The Market Infrastructure Government Bond Markets The Corporate Bond Market Credit Rating Agencies Securitization Market Market Bond Products Credit Derivatives Market Readership: Financial analysts, finance academics and business professionals with interest in the Euro zone financial markets, as well as post-crisis trends and developments.

"Euro Bonds: Markets, Infrastructure and Trends provides an outstanding and up-to-date guide to the Euro bonds markets. Detailed and well-documented, it presents a broad range of well-chosen topics in a precise and yet accessible style. It is an excellent choice for anyone seeking insight into the bond markets across the Eurozone and a valuable contribution to the study of these important markets." -- Nico van der Wijst, Professor of Finance, Norwegian University of Science and Technology "Euro bonds mean different things to different people. The authors provide a well-researched and well-written comprehensive view of a vast and fast growing area of investment products, financial markets and debt financing instruments. Their narrative comes complete with a wealth of nicely-presented data. The book is a must-read for those studying European markets and the economy and an invaluable reference for those immersed in it, be they policymakers, investors or academic researchers. A big question mark hangs over the future of this book: Will it become the standard reference it deserves? Or will it be consigned soon to a footnote on the history of the Eurozone? The answer is in the hands of Eurozone leaders. Will they decisively address the structural problems of the common currency or will they continue with piecemeal solutions to every new crisis? For the sake of the authors and of the people of Europe, of course; I hope for the former. The book itself offers some valuable guidance." -- Stavros A Zenios, Professor of Finance and Management Science, University of Cyprus and Senior Fellow, the Wharton Financial Institutions Center, USA "The recent Global Financial Crisis of 2007-09 has highlighted the critical role of corporate bonds, government bonds and sovereign debt, the role of credit rating agencies, securitization, and credit default swaps. This is a truly remarkable book that addresses all these issues with reference to the European bond markets. The book is a masterful creation of internationally recognized scholars and offers generous instruction and valuable insights; it is destined to become a classic in its field." -- Tassos Malliaris, Walter F Mullady Professor of Economics and Finance, The Quinlan School of Business, Loyola University Chicago

From the Inside Flap Euro Bonds: Markets, Infrastructure and Trends presents the most recent developments in the Euro bond market. It discusses the problems of the Euro countries, the proposed solutions advocated by European as well as international institutions and investors. Particular emphasis is given to systemic risk and contagion as well as to specific innovative instruments such as structured financial products which protect various classes of investors. This self-contained title provides an organized and comprehensive overview of the current financial situation in Europe and accords the reader the opportunity to understand fully what is happening in the Euro financial market today, as well as some of the possible exit strategies from the crisis. It may be used as an advanced textbook by postgraduate students as well as ambitious undergraduates in finance and economics. It is also useful for non-experts in finance who wish to have an overview of problems in the Euro zone.
