A. Seddik Meziani : Exchange-Traded Funds: Investment Practices and Tactical Approaches before purchasing it in order to gage whether or not it would be worth my time, and all praised Exchange-Traded Funds: Investment Practices and Tactical Approaches:

With Exchange Traded Fund (ETF) sponsors constantly making new types of ETFs available, there is now a variety of ETFs that provide investors with an opportunity to develop diversified investment portfolios. Their sophistication has also grown to include a breed of ETFs that do not passively track the performance of an underlying index. With this assortment of newer ETFs, and more on the way, market strategists are now capable of devising all-ETF portfolios based on a multitude of asset allocation schemes that respond to the need of their clients. This book provides a comprehensive overview of the changes brought about by ETFs. It describes and analyses recent changes alongside their impact on investment portfolios, and discusses the continuing success of index-based ETFs and the reasons underlying their long-lasting achievements. The book offers an objective discourse on the newly minted smart beta ETFs and some of the issues surrounding them, and provides an overview of how the increasingly widespread ETF-based portfolio hedging strategies are constructed and implemented. Paying particular attention to the importance of asset allocation and the essential role it plays in portfolio construction, this book explores the role played by ETFs in changing investors' attitudes toward home bias, covering both established and emerging frontier markets. The author leverages his extensive background to integrate best professional practices and academic rigor for an increased understanding of the ever-evolving world of ETFs.

About the Author Seddik Meziani is Professor of Economics and Finance at Montclair State University, Department of Economics and Finance. He has previously written a book called Exchange-Traded Funds as An Investment Option and has published numerous ETF articles in both academic and practitioners journals. Seddik is regularly invited to speak as an expert on a variety of ETF topics at practitioners conferences where he can give experience and academic perspective on ETFs. Since 2000, he has been one of the earliest researchers on the topic of ETFs publishing the first academic article covering tax efficiencies of ETFs. He covers the benefits and features of ETFs in class syllabi, internal training and numerous external training classes, and is contracted as a consultant to produce white papers on indexes and ETFs, as well as being frequently quoted in the business press
