**Ernesto Vivares : Exploring the New South American Regionalism (NSAR) (The International Political Economy of New Regionalisms Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Exploring the New South American Regionalism (NSAR) (The International Political Economy of New Regionalisms Series):

The events and processes that have taken place in the last decade in South America have given way to one of the most interesting regional phenomena under a global crisis and within a changing world order. From the traditional status of Washington's backyard and reign of economic and political stability, South America has increasingly turned into a region marked by a heterodox development in the light of other dominant regional tendencies of development—the European Union, NAFTA and the Asia Pacific. The political economic nature of the new South American regionalism (NSAR) is far from echoing the dominant interpretations about it, which reflects the major regional projects today. Given the reach and scope of the existing literature on the topic of the NSAR, there is an important gap concerning its academic exploration in relation to its nature of development, political economic complexity, challenges and orientations. In this sense, this book explores, from a wider and pluralist political economic perspective, the developmental dimensions of the NSAR within a changing hemispheric and world order in transformation. It analyses a set of specific debates: regionalism in the Americas then and now; social and economic development and regional integration; and organized crime, intelligence and defence. An in depth and critical reflection on the complex and heterogeneous path of regionalization taking place in South America from different perspectives and in key issues of regional development.

"This much-awaited book is the most impressive account of the regional dynamics of development in South America in recent decades. In a balanced way, it uncovers how the region is reconfigured by forces and changes from inside as well as outside the region. The book is also a major contribution to "new" and comparative regionalism more broadly. It is crucial reading for anyone who can accept that South American regionalism is not simply an emulation of regional projects and models in other parts of the world.' Fredrik Soderbaum, University of Gothenburg, Sweden, and United Nations University-Comparative Regional Integration Studies (UNU-CRIS)' South America is undertaking daunting challenges in the politics of development. This book shows us what is at stake in the multiple areas of region building.' Diana Tussie, FLACSO, Argentina About the Author Ernesto Vivares, FLACSO, Ecuador.
