Numerical, Verbal and Non-verbal Practice Questions to Help You Land that Senior Job (Testing Series):

2 of 3 people found the following review helpful. It needs more attention to details. Many incorrect figures. By CustomerI would rate it better but I can't understand why many of the questions have incorrect figures, thus it confuses you when you are trying to resolve the problem. I.e. Q33 Sales for both markets totalled a disappointing 119 for 2003 and were earned at the same ratio between markets A and B as in 2003. What was the value of market A that year? The second 2003 is a mistake and there is nothing that you can do but just wander and think that you are an idiot for not being able to resolve it. You can just tell that it was 2004 when you go to the Answers page. When you pay 19\$ to study psychometrics tests you expect better than that. If it was free I would not mind.

With intense competition for top management jobs and increased pressure on organizations to select the best candidates, more and more firms are now using challenging psychometric tests as part of their recruitment and assessment procedures. Also used to identify management potential in existing staff, tests are increasingly used to select the weakest employees when job cuts beckon. Management Level Psychometric Assessments offers more types of assessment than any other management testing book. Ideal for managers applying for supervisory roles or jobs on the board, for promotions as well as new employment, it includes tests on quantitative reasoning, currency conversion, verbal reasoning, decision analysis, situational awareness and visual estimation. Along with detailed answers and explanations, it places particular emphasis on getting you test-ready, with advice on the presentation part of your assessment and crucial information on which tests you are most likely to face for your industry. Management Level Psychometric Assessments is an invaluable resource providing all the practice you need to pass those tests and succeed against the competition.
