Enjoyed the book and workbook !!!By C.L.Workbook was in excellent condition and shipping was fast.Bought this workbook as well as the book a while back to add to my personal library and completely enjoyed reading the book as well as working all the problems/calculations that came in the study manual (workbook) that can be purchased seperately.While the book and workbook may not be for

everyone I completely enjoyed reading the book and working all the calculations. Would recommend both the book and workbook to others who enjoy reading financial textbooks such as I do. However I would not encourage someone to read it unless they already have a solid understanding of finance otherwise it may be beyond the scope of their comprehension. Note: This workbook and book were purchased for hobby reading since my academic and professional background is finance, however I am not a CFA or plan on sitting for the CFA Exam. 5 of 5 people found the following review helpful. Barebones Basics By Reginald Tucker I purchased this and the Quantitative Investment Analysis Workbook' and was slightly disappointed. The workbook is good in that it forces you to work out quantitative problems, but the concept descriptions can be oversimplified. Good if you have a good base and want to review quantitative theory, but don't expect to learn these concepts in-depth.

In the Third Edition of *Managing Investment Portfolios*, financial experts John Maginn, Donald Tuttle, Jerald Pinto, and Dennis McLeavey provide complete coverage of the most important issues surrounding modern portfolio management. Now, in *Managing Investment Portfolios Workbook, Third Edition*, they offer you a wealth of practical information and exercises that will solidify your understanding of the tools and techniques associated with this discipline. This comprehensive study guide--which parallels the main book chapter by chapter--contains challenging problems and a complete set of solutions as well as concise learning outcome statements and summary overviews. Topics reviewed include: The portfolio management process and the investment policy statement Managing individual and institutional investor portfolios Capital market expectations, fixed income, equity, and alternative investment portfolio management Monitoring and rebalancing a portfolio Global investment performance standards
