4 of 4 people found the following review helpful. Click "Add To Cart" NOW! By Eric Su This book should be incorporated into formal education system. If everyone would have read this book then we will all live in a harmonic

society. It's a must-have book no matter you're seeking advices on how to succeed at work, business, how to set a goal and achieve it, how to win friends, or how to build a better relationship with your family and your other half. The book title should be "How To Be Successful In Life" The writing style and layouts are very easy to read and understand. Every book should be written in this way. There's no big words in this book so if you have children, I would recommend you to give them the books to read after you're done reading it. They will love you and respect you more for teaching them the lessons of a successful life. I really like the later chapters when Brian got into how to master human relationships. He said "Love is the most important thing in life." Can it be more truthful? Only 10% of the key points in the book:- You can't give what you don't have. You need to like and respect yourself more before you can love and respect others.- Never criticize- You are where you are because of your past decisions- You are responsible for everything that happened in your life, so stop blaming.- Peace of mind is essential to success in everything. It's also the highest human good.- One of your major responsibilities is to get your life under your control.- What you sow is what you reap- Whatever that you expect with confidence becomes your own self-fulfilling prophecy.- Your outer world is a reflection of your inner world- Law of substitution: Your conscious mind can only hold one thought at a time, replace negative thoughts with positive thoughts throughout the day.- Some affirmation tips on achieving your goals.- 12 step system for goal setting and goal achieving
