In this second edition of his popular Psychology 101 $\frac{1}{2}$, eminent psychologist Robert J. Sternberg updates and extends a trove of wisdom gleaned from decades of experience in various academic settings and leadership positions.

In his signature straightforward, intellectually honest, and pragmatic style, he imparts life lessons for building a successful and gratifying career. This revision features lessons in five basic categories: identity and integrity, interpersonal relationships, institutions and academia, problems and tasks, and job and career. Recent developments in the field are covered, and new questions at the end of each lesson prompt reader self-reflection. Valuable to academic psychologists at any level, this book will be especially prized by graduate students, post-doctorates, and early-career professors.
