found the following review helpful. WOW - What A Book! By Songbird
This book is an excellent book to read in addition to the Bible. If you have some knowledge of the Bible you will find this book offers some additional insight that is not in other commentaries. This author is an inspiration to me to dig deeper in the word of God. Because it is written in 1929 do not let that cause you to think it is old school and outdated. It is not! I am still reading it as it is too much information to ingest in a couple days. The book starts off with an explanation that the Bible was written "for all classes of people and for our learning" and the Bible is not addressed to all people in general. Part of the Bible is to address to the Jews, Gentiles and to the Church which constitute the three classes. Mr. Larkin gives his explanation of the ages and dispensations. He continues on to explain the age of the earth that in Gen 1:3-31 was the restoration of the earth to its original condition before it was made "formless and void" and submerged in water and darkness and how there is millenniums of time that science may require for the formation of the earth as a planet. His teachings throughout the book are thought-provoking and shed some light on questions I have had such as election and free-will, Heaven and Hell, Judaism and Christianity. It is 328 pages of Biblical explanations and charts. I definitely find this a must read.
