**Christian Szylar : Risk Management under UCITS III / IV: New Challenges for the Fund Industry** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Risk Management under UCITS III / IV: New Challenges for the Fund Industry:

Risk Management under UCITS III/IV shows how asset managers, fund administrators, management companies

and risk departments can satisfy the various financial regulators, which govern European markets, that they have adequate risk monitoring procedures in place for the funds they manage or administer. The book explains all the requirements for risk management under the new UCITS III/IV regime, as well as the universe of financial instruments which can be used by portfolio managers, and identifies their associated risks and possible mitigation strategies. It is therefore required reading for anyone trying to fully understand and comply with UCITS III/IV requirements.
