Jeremy Swinfen Green, Paul Dorey : The Weakest Link: Why Your Employees Might Be Your Biggest Cyber Risk before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Weakest Link: Why Your Employees Might Be Your Biggest Cyber Risk:

The Weakest Link looks at one of the biggest issues in cyber security: how to protect organisations from their own employees. Many cyber threats don't involve hackers using clever software to penetrate company networks; threats can

often involve employees acting in ways that, accidentally or deliberately, leak information or damage assets without a hacker being involved at all. Emerging technologies and behavioural changes - driven by cloud computing and people using their own smartphones and tablets for work - are starting to make these threats more common and far more serious. Written to help anyone understand how information security has become the responsibility of individual employees, it shows exactly what they can do to protect company systems and data. Effective solutions need to go beyond simple security awareness and show how to create a complete culture of security. Individuals can then use this learned behaviour to keep themselves digitally safe at work and in their personal lives.

About the AuthorJeremy Swinfen Green has worked in digital business for over 20 years, with a specialism in social media risk. He is a member of the Finance and Performance board of TechUK (the trade body for the UK's technology industry). Paul Dorey has worked in the cyber-security industry for over 25 years, including senior posts at Barclays, BP and GlaxoSmithKline. He is Chairman Emeritus at the Institute of Information Security Professionals, and is a Visiting Professor at Royal Holloway College, University of London.
