**From Routledge : Time in Organizational Research (Routledge Studies in Management, Organizations and Society)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Time in Organizational Research (Routledge Studies in Management, Organizations and Society):

Today there is widespread awareness of the fact that time has been under-investigated in organizational studies. This book addresses the need to bridge the gap between the predominantly "timeless" theories and models that scholars have produced and the daily experiences of employees and managers, in which time is salient and extremely

important. These chapters offer a broad range of concepts, models, and methods that are tailored to this purpose. The first part of the book is devoted to the way in which people in organizations manage time, summarizing research findings, presenting novel ideas on a broad range of issues and examining issues such as whether time can be managed, how people are affected by deadlines and how do strategic changes in organizations affect individuals' careers and sense of identity. The second part is about time as embedded in collective behaviours and experiences, and in temporal regimes linked to organizational structures. It discusses ways to study such collective patterns and their relationships to management practices, and addresses topics such as sensemaking of dynamic events, rhythmic patterns and their impact on organizational effectiveness, time in industrial relations, and power and temporal hegemony. A third part with a single concluding chapter looks at possibilities for integrating the various approaches and provides suggestions for future research. This book adopts a pluralistic approach, arguing against timeless conceptions in organizational theory and behaviour and instead emphasising the importance of temporal analysis.

About the Author Robert A. Roe is Professor of Organisational Theory and Organisational Behaviour at the University of Maastricht, the Netherlands. Mary J. Waller is Professor of Team Dynamics at the Faculty of Economics and Business Administration of Maastricht University, the Netherlands. Stewart R. Clegg is Professor at the University of Technology, Sydney, and Research Director of the Centre for Management and Organization Studies.
