Wieslaw M. Grudzewski, Irena K. Hejduk, Anna Sankowska, Monika Wantuchowicz : Trust Management in Virtual Work Environments: A Human Factors Perspective (Ergonomics Design Mgmt. Theory Applications) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trust Management in

Virtual Work Environments: A Human Factors Perspective (Ergonomics Design Mgmt. Theory Applications):

Already a significant human factor issue, trust is an especially hot topic in today's business world where so much of the contact is virtual. Providing the first elaboration on this subject, the authors conduct an interdisciplinary investigation into the many facets of trust as they relate to the design and management of virtual business environments. They explore trust between organizations, between business partners, as well as trust between employer and employee. Involving theory and practice, this work provides the first scientific and systematic evaluation of global trends and practices regarding trust between people in all aspects of their professional lives.
