**Peter Murphy : Universities and Innovation Economies: The Creative Wasteland of Post-Industrial Society** before purchasing it in order to gage whether or not it would be worth my time, and all praised Universities and Innovation Economies: The Creative Wasteland of Post-Industrial Society:

0 of 0 people found the following review helpful. Five StarsBy Michael MooreFirst class

Students drop out of universities in large numbers, many graduate to jobs that do not require a degree and a large number learn little at university, whilst graduate salaries have shrunk over time and student loan debt and default have grown. University research achievements have declined while university administration has expanded massively. The contemporary university is mired in auditing, regulation, waste and aimlessness and its contribution to serious social innovation has deteriorated markedly. The miserable state of the universities reflects a larger social reality, as bureaucratic capitalism has replaced creative capitalism. *Universities and Innovation Economies* examines the rise and fall of the mass university and post-industrial society, considering how we might revitalize economic and intellectual creativity. Looking to a much more inventive social and economic paradigm to drive long-term growth, the author argues for a smaller, leaner, more effective university model - one capable of delivering a greater degree of high-level discovery and creative power. A potent critique of the post-industrial mass university that urges a reimagining of universities as places of discovery and invention, this book will appeal to readers interested in higher education, creativity, social theory, the sociology of work and organisations, political economy, pedagogy and public policy.

"Peter Murphy has written a cogent and compelling indictment of the costs to society and education of the bureaucratization of the university. The fatal unintended consequence of the mass expansion of universities since 1970 has been the swamping of the university's core functions of teaching and research by policy, process, and performance management. The destruction of academic autonomy by a proliferating parasitic administration is at the heart of the systemic crisis of the signature institution of post-industrial knowledge society. Peter Murphy's book is essential reading for all who care about the future of universities." David Roberts, Emeritus Professor of German, Monash University, Australia..
