A. Chakravarti, M. Thomas : Why People (Don't) Buy: The Go and Stop Signals before purchasing it in order to gauge whether or not it would be worth my time, and all praised Why People (Don't) Buy: The Go and Stop Signals:

1 of 1 people found the following review helpful. Fascinating Insights and Case StudiesBy M MarcusWhy People (Don't) Buy contains some fascinating insights and case studies for anyone interested or working in marketing, consumer behavior or psychology. I found the results of the case studies centered on consumer incentives and consumer perception to be quite surprising at first until I read further into the go and stop signals described. The book

uses the Go-Stop Signal framework to challenge readers to dive deeper into promotions, programs, branding and other activities brands, marketers and companies employ and identify pros and cons of what often look like "slam dunks" on the surface but can easily backfire. 1 of 1 people found the following review helpful. Engaging read with actionable takeaways
By MLA fantastic read which includes many important actionable insights that a marketer is able to adapt to whatever industry he/she works in. There are a number of interesting case studies that help to illustrate how consumers react to very specific situations and stimuli. The PTL (Predict-Test-Learn) framework was particularly helpful for me as it details low-cost/low-risk ways that an organization can experiment and adjust based on observed consumer behavior. 1 of 1 people found the following review helpful. A must-read for marketers
By Customer I read this book for a strategic marketing class in an MBA curriculum and it has proven to be one of the most useful marketing references that I've come across. Chakravarti and Thomas present simple, yet extremely useful frameworks to help marketers across industries make better business decisions. This well written book is a fast and enjoyable read from which all marketers could benefit.

Full of practical diagrams and maps, as well as international case studies, this book offers a unique and extensively-tested 'GO-STOP Signal Framework', which allows managers to better understand why consumers are not buying their products and what can be done to put this right.

'Chakravarti and Thomas offer a thoroughly modern view of consumer decision-making, grounded in persuasive behavioral research and laden with practical, game-changing insights. Their 'GO-STOP Signal' Framework offers a fresh take on consumers and is a powerful and versatile tool to help marketers make fundamentally better decisions.' - Kevin Lane Keller, Professor of Marketing at Tuck School of Business at Dartmouth College; Branding Guru; author of the bestselling book *Strategic Brand Management*
'Chakravarti and Thomas breathe new life into what was once considered the oxymoronic phrase, 'marketing science.' Building on the venerable approach-avoidance tradition in behavioral science, their 'GO-STOP Signal' Framework sheds new light on why certain strategies work while others generally fail. This book will be a big hit with both practicing professionals and students in MBA classrooms.' - Robert H. Frank, Professor of Management and Economics at Johnson Graduate School of Management, Cornell University; author of the award-winning book *The Darwin Economy*
'A smart, entertaining, and practical read that opens up big new insights about consumer behavior.' - Adam Grant, Wharton professor; New York Times bestselling author of *Give and Take*
'Understanding your customers is vital to any business. But gaining that understanding is often harder than it looks. *Why People (Don't) Buy* provides a step-by-step guide to consumer insight. Filled with engaging stories and surprising findings, it provides a handy framework for why people do what they do, and how you can use that information to be more effective.' - Jonah Berger, Wharton Professor; New York Times bestselling author of *Contagious: Why Things Catch On*
'*Why People (Don't) Buy* is an engaging compendium of smart, down-to-earth advice for marketers who seek to understand why their customers sometimes do (and sometimes don't) buy. Chakravarti and Thomas take their readers on an entertaining journey through many of the marketing world's most insightful and important studies. This book is a 'must-read' if you've ever wondered why \$2.99 seems like a far better deal than \$3.00, why people pay a premium for tiny 100 calorie snack packs, and why the same wine tastes better at \$50 a bottle than \$10 a bottle.' - Adam Alter, Associate Professor of Marketing at NYU Stern School of Business; New York Times bestselling author of *Drunk Tank Pink*
About the Author
Amitav Chakravarti is Professor of Marketing at the Department of Management, London School of Economics and Political Science, and wrote part of the book when visiting the Sloan School of Management, MIT. Currently he is on the faculty of University of California, Riverside. Prior to his appointment at LSE, he was an Associate Professor at the Stern School of Business, New York University. He received his PhD from the University of Florida (Go Gators!) and his research has been published in leading journals like *Journal of Marketing Research*, *Journal of Consumer Research*, *Journal of Consumer Psychology*, and *Journal of Experimental Psychology: Learning, Memory, and Cognition*. He was awarded the Google-WPP Marketing Research Award and the Marketing Science Institute (MSI) Young Scholar Award, and named among the "Top 10" instructors at the Department of Management, LSE. Chakravarti spends a lot of his time in the concrete jungles of New York City, but still misses his childhood days growing up near a Rhino reserve.
Manoj Thomas is Associate Professor of Marketing and Director of Business Simulation Lab at the Samuel Curtis Johnson Graduate School of Management at Cornell University. He trains MBA students and executives to identify and test powerful consumer insights. Thomas has received the Apple Award for Excellence in Teaching. He holds a PhD in marketing from the Stern School of Business at New York University. His specialization is consumer psychology. His research has been published in the *Journal of Consumer Research*, the *Journal of Marketing Research*, *Marketing Science* and *Psychological Science*. Thomas has received several research fellowships, has been nominated an MSI Young Scholar, and is an Associate Editor for the *Journal of Consumer Psychology*. He lives in the idyllic town of Ithaca, NY with his charming wife and two sons.
