Completely worthless...By Monica MainI should have listened to the negative reviews.First of all, I don't like Joe Vitale and promised myself that I would never get ripped off again by him. However, I was hoping to have found a "gem" in this since someone else (Jillian Coleman Wheeler) wrote

it.Nope, no such luck!This book gives you a brief overview on how to make money online which is OPPOSITE of the promise on page 3 which says, "In this book, we tell you everything you need to know about doing business on the Internet. We guide you as you select a business model, and we give you a clear, powerful plan with action steps you can follow. We lead you to the tools that will make your work easier and more profitable."So, where is this information they promised? NOWHERE TO BE FOUND.The book is nothing but fluff with a bunch of website addresses that you can go to that sells other people's stuff. I'm sure Vitale gets a piece of the action somehow if you buy something.If you want to get scammed and feel ripped off then get this book.3 of 3 people found the following review helpful. Nice work.By LevaireThis is a great peek into the world of successful Internet marketing. Not only do you hear from Joe and Jillian--both doing well for themselves--but then they bring in a "panel" of contributors to offer additional insights and experiences. This makes the book that much richer and valuable than if it had been one perspective alone. Thank you to the authors for producing this one. As a budding marketing man (only been doing this for 16 years,) this book is a great collection of wisdom I will keep within arm's reach as I create my own marketing magic. Thank you, thank you, thank you. Matt4 of 5 people found the following review helpful. A very practical guide... Well Done!!!By Will PriceDear Jillian,Thank you for writing "Your Internet Cash Machine". I haven't finished it yet, but wanted to thank you for creating such a great resource that's easy to read (and listen to)!!!I must admit that because "money" isn't my primary motivator... I was somewhat dubious about the book because of its title. I'm glad that I gave your book a chance, and I expect to build a more successful business, faster, because I did.ADVISE TO YOUR READERS: Never judge a book by its cover, or by the words of a few detractors.Success will not "jump out of the pages" and into people's lives without deliberate action and follow through!I see your book as a valuable and practical guide to Internet Marketing for new and existing businesses, by using what is already available online, affordable and oftentimes, free. Your book shows what options and tools exist, where to find them... and how to use them to achieve very specific and well thought out goals.Of course it takes some planning, "quality" work, and follow through to get the desired results - but that's key to building a successful business, right?Your book presented valuable case studies, lessons learned and beneficial practices that I believe will help my business grow - even during challenging economic times. Your common sense approach to Internet sales and marketing can help any company do more, better, and faster for a fraction of the expected cost. This was another great and unexpected surprise.I look forward to putting your concepts into action and making a big splash soon. Stay tuned to my next (update) review!!!In closing, thank you for sharing your knowledge so willingly, freely and completely.The world is a better place because of people like you.With gratitude,Will PriceEntrepreneur
